-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. This communication is in response to the applicant's amendment filed on 10/31/2005. The Examiner has further reviewed and reconsidered the amendment. The review of the amendment reveals the deficiencies in the claims; hence claims 4 – 5; 6; 7 – 8; 10; 11; 12 – 14; 15 – 17; 18 – 20; 24 – 25 indicated as being allowable in the last Office Action (prosecuted by ex-Examiner (Lin Khoo)) are not conclusive. Accordingly, the Examiner hereby withdraws the allowability indication of those claims. Furthermore, Claims 1 – 25 are directed to two distinct, unrelated inventions, and therefore subject to election/restriction requirement.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1 – 3; 4 – 5; 21 – 25, drawn to apparatus having at least two spreaders/despreaders for spreading and despreaders signals and given different weights for controlling a diversity of data transmitted through the antennas, classified in class 370, subclass 335.
 - II. Claims 6 – 20, drawn to controlling a diversity of data transmitted during the soft handover process between base stations and mobile units, classified in class 370, subclass 331.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions Group I (Claims 1 – 3, 4 – 5, 21 – 25) and Group II (Claims 6 – 20) are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions because they have different effects, in that Group I directed to an invention deals with controlling a diversity of data transmitted through the antennas while Group II involved in a soft handover process between base stations and mobile units.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. A telephone call was made to Mr. Paul J. Farrell (at phone (516) 228-8484) on Feb 09, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew C. Lee whose telephone number is (571) 272-3131. The examiner can normally be reached on Monday through Friday from 8:30am - 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ricky Q Ngo can be reached on (571) 272-3139. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
